Investment Banking interviews typically start with a battery of questions about yourself. All those questions you will get in the investment banking interview have a single purpose and are trying to assess Adaptability, Analysis and Problem Solving, Commercial Awareness, Communication, Decision-Making and Judgment, Influencing and Persuasiveness, Leadership, Motivation, Relationship-Building and finally Teamwork.

**About Yourself**

1) Why did you choose to study economics/chemistry/history, etc.?

2) If you are from overseas, prepare to answer why you chose London?

   (Mention all the positives about London and how it is a financial center, multicultural, etc.)

3) What are your strengths and weaknesses?

   Good strengths include being a hard worker, analytical, curious, being a good communicator, a good team player, resistant to stress, don't give up easily. "Good" weaknesses can be being impatient, taking a lot of time to make decisions, because you always need a lot of information, being inexperienced in finance (of course, that could describe all of the students), being a bad loser. Characteristics not to mention: your intelligence, introversion, shyness, or individualism.

4) Have you enjoyed your study? Why?

   (Answer must be “Yes.”)

5) What is the achievement you feel proud of or least proud of?

   The best examples are where you had to make a lot of effort, either hard work or team achievement. You can use sports, major study projects, or personal travel. The least proud achievements can be any kind of failure, but you need to show that you have learnt from that failure.
6) What would your teachers or other students describe about you? (See strengths and weaknesses.)

(Mention what you learned from this and how you improved.)

(Again, mention what you learned from this and how you improved.)
